

Pablo Delfante

Graphic designer and Digital designer

I have participated in multiple projects building interfaces, design systems, and product definitions. In many of them, we achieved significant improvements in performance and scalability, meeting the user objectives defined in short periods of time, which positively impacted the final product.

PROJECTIONS

I consider group work skills to be highly important, particularly in large projects where the team's functionality is integral to the processes. Synergy, environment, and collaboration are vital components of effective teams.

Today I am preparing for an AWS certification, which I enjoy very much and benefits both me and my team. I really enjoy acquiring new skills; I recently completed an introductory in AI model training, and I'm starting to develop a mobile finance application. You can learn more about me in my portfolio or in my career path at pablodelfante.com/experience.
